Creating a Family chart or Age Chart

Using the information below, create the chart by dragging and dropping the chart bars in the correct place.

My sister Paula has a big family. She lives with her husband, her three kids and with her mother-in-law. They live in a big house. With them also lives María, that helps her with the house keeping.
Paula is **40** years old;
Luis, her husband, is **46** years old.
Her kids are:
María Jose, she is **15** years old,
Luis is **12** years old and
Isabelle is **4** years old.
Her Mother in law, Martha is **70** years old.
María is **55** years old.

Remember, when you collect the information to create your family chart, make a list with the ages from the youngest to the eldest.

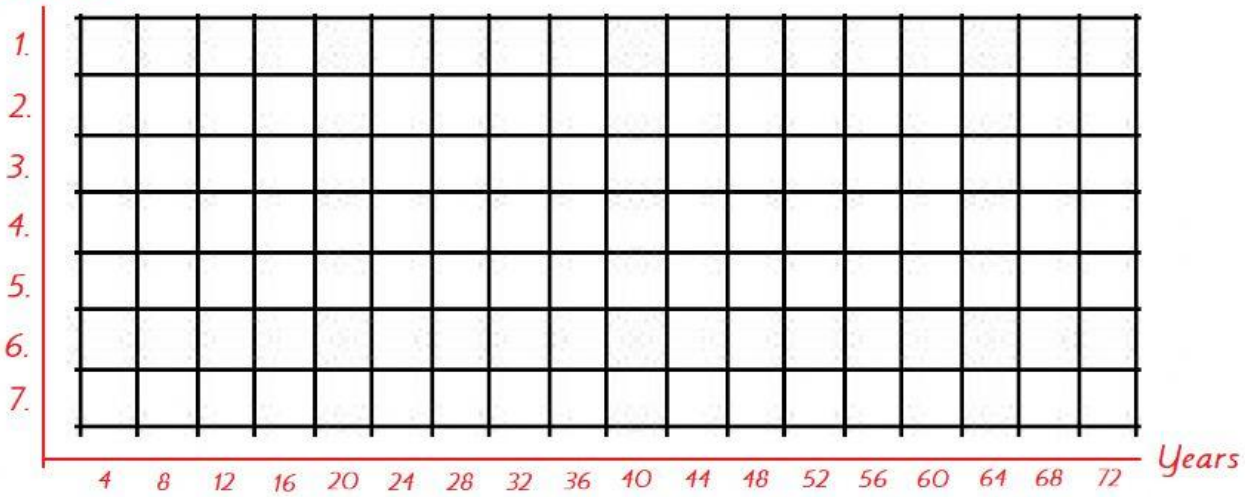
Using the list above, drag the names with the ages; and drop in the list below organizing the family members from the youngest to the eldest.

Check list:

1.
2.
3.
4.
5.
6.
7.

Family Members

Fill the boxes to complete each line with the correct age.



Each timelapse is 4 years.
