Grade 5 Lesson 23 Plants

Plants

1. Learn new words. Listen and repeat.

Изучи новые слова. Слушай и повторяй за диктором.

living things	живые существа, живые организмы	to chance	рисковать
a plant	растение	to feed	кормить
a rainforest	тропический лес, джунгли	to grow	расти
a scientist	ученый	to make	делать
oxygen	кислород	to produce	производить
to breathe	дышать	to take	брать

2. Listen and read the text about plants.

Послушай и прочитай текст про растения. Обрати внимание на выделенные слова.

Plants are **living things**. They **feed, breathe, grow**, and **make** new plants, but they are different from animals. Plants don't move from place to place like animals do. Plants keep growing, but animals don't grow when they are older.

Scientists don't know how many plants there are, but they think that there are more than 300,000 types! Many of these plants grow in **rainforests**. Scientists think that there are thousands more plants that we don't know about yet.

There were plants on Earth more than two billion years ago! The first plants didn't grow on land - they grew in water. It **took** hundreds of millions of years for plants to **change** and to grow on land.

Before plants, animals did not live on Earth. There was no **oxygen** in the air, and animals need to breathe oxygen. Plants **produced** oxygen and food for animals. They made life possible for us!

Discover!

Plants started to grow on land more than 400 million years ago. This is a fossil of one of the first land plants.

3. Guess the words. *Отгадай, какое слово зашифровано.*

1) talpn – plant

2) cisstinet –

3) sorefinrat –

4) geyonx –

5) bareeth –

4. Number the sentences in order. *Пронумеруй в правильном порядке события из текста.*

	There were animals on Earth.
1	There were no plants or animals.
	The first plants grew in water.
	Plants don't move from place to place like animals do.
	Scientists don't know how many plants there are.
	Plants produced oxygen and food for animals.

5. Write True or False. *Прочитай предложения и определи, соответствуют ли они содержанию текста. Запиши True или False.*

1) Plants feed and grow.	
2) Plants don't grow when they are older.	
3) The first plants didn't grow on land.	
4) Plants changed and then they grew on land.	
5) There are only 300,000 types of plant.	
6) Plants made Life on Earth possible for us.
