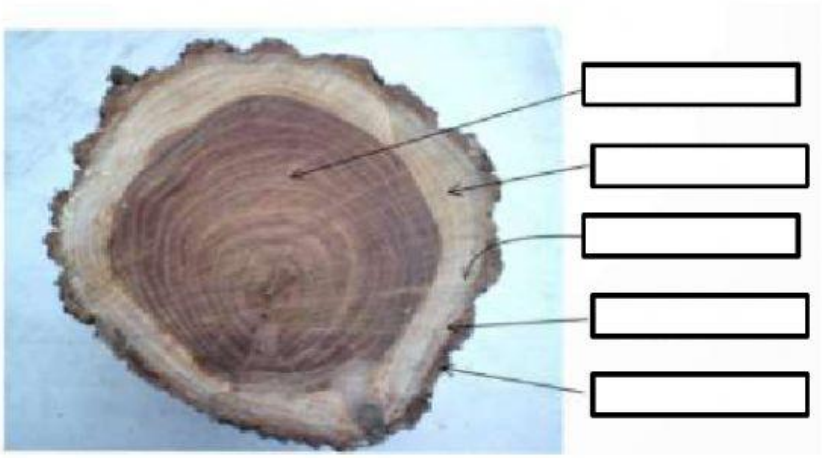
1. Name the parts of the tree trunk:

cambium | sap wood | heart wood | outer bark | phloem



2. Join the parts of the sentences

We first cut the tree trunks — covers the surface and protect the wood.

We transport the logs — into logs.

To protect the wood — by lorry or by floating them down rivers.

Varnish — we add insecticides to the wood planks.

3. Select the correct answer:

It forms the walls of vegetable cells.

It is a protection for wood.

They can eat wood.

4. Match each image with its word

Insect | Fibres | Tree trunk | Wood plank | Varnish
