Full name: …….. **ENGLISH LANGUAGE TEST**

Class: …….. **Time: 15 minutes**

I. READING

1. Read the passage about some future predictions and answer the questions. Circle A, B, or C.

Dr Pearson, a futurologist believes in 2045 buildings will be made from concrete plastics and shape-changing materials that can heal themselves and the builders will have super-strength skeletons creating half-man, half-machine workers. There will be a need for new kinds of elevators using magnetic systems.

By mid-century, buildings will be miles tall and some may be so large that their capacity enables them to function as small cities in their own right. As these buildings rise through the clouds, windows will be replaced by reality virtual screens so people can choose any view they like.

However, lack of exposure to pathogens will cause more allergies. Due to health concerns, scents, candles, incense are also likely to be more strongly regulated, added Dr Pearson.

1E. When does Dr Pearson make these predictions?

A. now

B. in 2045

C. after 2045

2E. What can future buildings do?

A. change shapes

B. use machines

C. self-heal

3M. What is TRUE about future buildings?

A. They will be very big.

B. They will be very tall.

C. They will be very modern.

4M. What will cause more allergies?

A. incense

B. pathogens

C. candles

5D. A futurologist is someone who _____ the future.

A. believes in

B. predicts

C. adds to

2. Read a passage about fossil fuels. Decide if the statements are true (T) or false (F). Circle T or F.

There are three major forms of fossil fuels: coal, oil and natural gas. All three were formed many hundreds of millions of years ago before the time of the dinosaurs – therefore we call them fossil fuels.

Fossil fuels take millions of years to make. But they are not unlimited. We are using up the fuels that were made more than 300 million years ago. They are not renewable like solar power, wind power, hydro power or biomass. Once they are gone they are gone. So, it's best not to waste fossil fuels.

We can save fossil fuels by conserving energy. One simple way to do this is to turn off appliances, TVs and radios that we are not using. We can also turn off lights when no one is in the room. Another way is to go by bike or walk instead of driving cars or motorbikes.

1E. Three major forms of fossil fuels are oil, coal and natural gas.	T	F
2E. They were formed right after the time of dinosaurs.	T	F
3M. Once fossil fuels are gone, they will come back later.	T	F
4M. Hydro power and biomass are non-renewable sources.	T	F
5D. Conserving energy is a good way to save fossil fuels.	T	F

– The end –
