Date: 4/12/2020 (FRIDAY)
Subject: ENGLISH FOR COMMUNICATION

Teacher: HAZAN SURIANI
Class: 1 ASPIRASI

Read the description below and guess the parts of the body.

My Skeleton | **My Muscle** | **My Organs**

Muscles help us to move, to breathe, to digest food and to pump blood around our body.

Every organ is different. It varies in size, function and action. The largest organ in the human body is the skin and the most mysterious organ is the brain.

The skeleton gives us shape and form. It also protects the organs in our body.
