

1 Read the text and choose a title.

a Technology is wonderful

My friend Agnes loves technology. She uses her computer, her tablet and her smartphone every day. She always does research on the Internet. She also prepares PowerPoint presentations for school. Every afternoon, she goes jogging and listens to music on her smartphone. In the evening, she always uploads photos, sends comments and chats online with friends. She usually reads the news on her tablet. At night, she goes to bed with her laptop and she watches videos on YouTube until 2.00 am, so she is very tired in the morning!

b Technology is not always marvellous

At weekends, she usually watches films and she sometimes plays online video games.

Agnes is addicted to technology and she has a big problem: she never has time to visit friends!
