Generalize

HW

- When you read, you can sometimes **generalize** about what you have read.
- A statement that generalizes, or a **generalization**, tells how some things are mostly alike or all alike.
- Make sure you can support your generalization with facts and logic.

Directions Read the following passage. Then complete the chart to make a generalization.

Once upon a time, there lived a boy who dwelled in a cave in a tall, misty mountain. The cave was not too large and not too small. It was a perfect home for the boy. He was alone, but he was never lonely because the animals were his friends. The

eagle brought him fish from the river far below. The ram showed him paths around rocky cliffs and through hidden canyons. The mountain lion told stories that made the boy laugh. The boy and the animals lived together happily on the mountain.
