Mobile hates

Speaker 1

I'm a shop assistant and I work in a clothes shop and what really [1]_____ me angry is when I'm serving somebody and suddenly their mobile rings and they [2]_____ the phone and start [3]_____ a conversation. It's really annoying. I think that if you're in a shop and talking to a shop assistant, then you shouldn't answer the phone.

Speaker 2

What most [4]_____ me is people who use their phones on a plane. I mean everybody knows that you have to [5]_____ your mobile on a plane and that you mustn't use it until you get off the plane. But some people [6]_____ their phones the moment the plane lands and they start [7]_____ calls. Why can't they wait another fifteen minutes?

Speaker 3

I hate it [8]_____ people talk very loudly on their mobile phone in a public place. The other day I was in the waiting room at the doctor's and there was a man there whose mobile [9]_____ about every two minutes and we all had to listen to him talking loudly to his wife, then to his boss, then to a garage mechanic … I think that if you're in a public place and someone calls you, you should talk really [10]_____ or go somewhere else. And you don't have to shout – the other person can hear you perfectly well.

Speaker 4

What really annoys me are people who [11]_____ their phones a lot when they're with other people – like when you're out having a drink or a meal with someone and they spend the whole time talking on their mobiles or [12]_____ other people to arrange what they're doing the next day. I think it's really rude.

Speaker 5

I hate people who use their mobiles in the car, even if they're [13]_____ free. Whenever you see someone driving badly, nine times out of ten they're [14]_____ the phone.
