The word “technology” was created in the early 17th century to refer to the application of scientific knowledge for practical purposes and to the machines and equipment created from it, especially in industry. In every specific area (medicine, agriculture, communication, industry,

homelife, entertainment, etc) we can observe the evolution of technology in it. American photographer Rick Smolan (1949-) once said: "Every time there's a new tool whether it's internet or cellphones or anything else, all these things can be used for good or evil. Technology is neutral; it depends on how it's used"
