Name _____

Solve each word problem.

The pizza had 4 slices.

Michael ate $\frac{\text{one } 1}{\text{six } 6}$ of the pizza. Ethan ate $\frac{\text{four } 4}{\text{six } 6}$ of the pizza

How much pizza did they eat altogether?

$$\frac{\square}{\text{six } 6} + \frac{\square}{\square} = \frac{\square}{\square}$$

The pizza had 6 slices.

Michael ate $\frac{\text{two } 2}{\text{eight } 8}$ of the pizza. Ethan ate $\frac{\text{four } 4}{\text{eight } 8}$ of the pizza

$$\frac{\square}{\text{eight } 8} + \frac{\square}{\square} = \frac{\square}{\square}$$
