

Chapter 5 – Lesson 2

Metals, Nonmetals and Metalloids

Match the scientific term with the definition:

1. Luster

A. **Heat flow** in metals

2. Heat conductor

B. It can be **shaped, bent or hammered** without breaking

3. Ductility

C. **Shinny**

4. Electricity conductor

D. Can be drawn into **thin wires** without breaking

5. Malleability

E. **Electricity flow** in metals

6. Solid

F. Most metals are **solid** except mercury
