Mount Aso, Kyushu, Japan

Mount Aso is a famous volcano in Kyushu, Japan. Mount Aso is one of the most famous volcanoes in Japan. There is even a Mount Aso Museum!

Mount Aso is not a very high volcano. It is about 1592m high. It is very steep (陡), so it is called a cinder cone volcano.
It has unique scenery (獨特的風景) and many people go hiking around the volcano. But, they have to be very careful!

Mount Aso is an active volcano (活火山) and can erupt (爆發) at any time. The last big eruption was in 2021. The steam (蒸汽) and ash flew very high into the sky, but no houses were damaged (被損壞). Luckily, no people died, but many animals died.

Mount Aso is a very powerful and dangerous volcano!
