Understanding Report Text

FUNCTION

The function of report text is to describe information about events that have occurred after thorough observation and analysis. The results of observation activities in a matter must be facts and what they are.

Step of Undestanding Report Text

Identifying the main topic: Understanding the main subject discussed in the text.

Understanding factual information: Recognizing and understanding the facts presented about the subject.

Interpreting data: Understanding the significance of data or statistics that may be presented.

Understanding context: Understanding how information in the text relates to general knowledge or related issues.

Identifying purpose: Understanding why the information is presented and what the author is trying to achieve.

Reading-Viewing Activity

Read the dialog and understand the meaning of the dialog.

A: I read the newspaper this morning, the newspaper said that the Sumatran tiger population is increasingly threatened.
B: That's sad news. Why?
A: The Sumatran tiger population is increasingly threatened because there is still a lot of poaching and land clearing for plantations.
B: That's very sad news. Two days ago I also saw the news that the bird of paradise population was also threatened.
A: That sad! The bird of paradise had a very beautiful feathers.
B: Well, because of the beautiful color of its feathers, this bird is being hunted illegally.
A: Forest destruction in Papua is also a cause, isn't that right?
B: Yes, you are right. Forest destruction in Papua is very rapid, because of that, many of the natural habitats of the Austronesian fauna were destroyed.
A: Whereas the Sumatran tiger and bird of paradise are the pride of Indonesia's fauna.
B: Many Sumatran tigers live in captivity, therefore, many of them can still survive.
A: Yes, you are right. Living in the wild for Sumatran tigers is risky, because there are many illegal poachers.
B: Many birds of paradise also live in captivity, so that they be preserved.
A: I think that's for the best. Birds of Paradise are the pride of Papua and Indonesia, therefore, we must protect them.
B: Yes. Because Indonesia has a lot of protected flora and fauna, we as the next generation must understand the importance of nature conservation for a better nation's future.

Read the dialog and understand the meaning of the dialog.

Threats to Indonesia's Fauna

Sumatran tiger populations are threatened by poaching and deforestation for plantations.
The bird of paradise population is threatened by illegal hunting for its beautiful feathers and habitat destruction in Papua.

LIVEWORKSHEETS

Impact of Habitat Destruction

Forest destruction in Papua has led to the destruction of habitat for endemic fauna in the region.

Sumatran tigers are at high risk in their natural habitat due to poaching.

Conservation Efforts

Some Sumatran tigers and birds of paradise have been successfully bred in captivity to maintain the survival of the species.

The importance of nature conservation as the responsibility of the younger generation for the future of the nation.

Conclusion

This dialogue highlighted the serious issue of the extinction of Indonesia's fauna and the importance of protecting endangered species.

Activity 5

Scan the QR code provided, then analyze the meaning of the report text.
