Identify the aspect of each verb underlined.

The concept of literacy **is changing** with the evolution of technology. In fact, in the 21st century, literacy skills **involve** the use of technology and the abilities necessary to solve problems, collaborate, and present information through multimedia.

Consequently, the definition of literacy **has** increasingly **embodied** the ability to use technology for different purposes. For this reason, researchers and theorists from various fields **have been trying** to identify the new concepts of literacy that **address** diverse skills.

These concepts **include** information literacy, multiple literacies, new literacy, digital literacy, and web literacy.
