

**LO: Read a calendar and calculate time intervals in weeks or days.**

**STORMY**

## Days in the Month

How many days are there in each month?

Read the poem and then use it to complete the table.

Thirty days in September,  
April, June and November;  
February has twenty-eight  
All the rest have thirty-one.

Except in Leap Year,  
that's the time  
When February has twenty-nine.

| Month    | Number of Days | Month     | Number of Days |
|----------|----------------|-----------|----------------|
| January  |                | July      |                |
| February |                | August    |                |
| March    |                | September |                |
| April    |                | October   |                |
| May      |                | November  |                |
| June     |                | December  |                |

**SUNNY/WINDY**

## Reading Calendars

1. Fill in the missing numbers on the calendar.
2. How many Wednesdays are there in July? \_\_\_\_\_
