11. Every Monday, Sally ____ her kids to football practice.
    A. drives B. drove C. driving D. drive

READING

DOLPHINS

LIVEWORKSHEETS

Dolphins are mammals, not fish. They are warm-blooded like human beings, and give birth to one baby at a time, which are called calfs. At birth, a bottle-nose dolphin calf is about 90-130 cm long and will grow to approximately 4 meters, living up to 40 years.

They are highly sociable animals, living in groups called pods. These pods are fairly fluid, and dolphins will often interact with several different pods at once. They carry their young inside their womb for about 12 months. The baby is born tail first, and its mother will feed the calf for up to 2 years. However, the calf will stay with its mother for between 3 to 6 years, during which time it will learn all about feeding techniques, social interaction and group hunting.

12. What are dolphins?

A. Fish B. Reptiles C. Felines D. Mammals

13. What is the group of dolphins called?

A. a calf B. a herd C. a school D. a pod

14. How long does a dolphin calf stay with its mother?

A. 2 years B. 40 years C. 3-6 years D. 30 years

15. What is a baby dolphin called?

A. a pod B. a calf C. a fish D. a baby

PRONUNCIATION

Find the word which has a different sound in the part underlined.
