i. Solve the following problems.

1. At the supermarket, there are 256 packs of cookies to be equally divided among 8 baskets. How many packs of cookies will each basket receive, and how many packs will be left over?

2. Sarah bought 198 crayons at the supermarket. She wants to share them equally among her 9 friends. How many crayons will each friend receive, and will there be any leftovers?

3. The supermarket has 324 apples in stock. If they want to pack them into bags with 26 apples each, how many bags can they make, and will there be any apples left unpacked?

4. Jackson has 187 marbles to share with his 6 cousins. If he wants to give the same number of marbles to each cousin, how many marbles will each cousin get, and how many marbles will remain with Jackson?

5. Lily collected 153 seashells at the beach and wants to display them in jars with 34 seashells each. How many jars will she need, and will there be any seashells left unused?
