Read the following passage and mark the letter A, B, C or D on your answer sheet to indicate the correct answer to each of the following questions from 31 to 36.

Every year, the average temperature of the Earth's surface gets a little bit warmer. This **gradual** trend is called global warming. Warmer weather may sound nice, but global warming is something to be very concerned about.

Scientists are worried that continued warmer temperatures could damage the environment in many devastating ways. Rising temperatures might cause plants and animals to become extinct. They could melt enough polar ice to cause the levels of the sea to rise. Weather patterns could also change. There might be more droughts or serious storms with flooding. In some areas, human diseases could spread.

What is causing global warming? Humans are mostly to blame. Pollution from factories and cars add toxic gases to the air. These gases rise to the earth's atmosphere. As the sun's rays warm the Earth, the gases work much like the glass in a greenhouse. They help trap the heat in the atmosphere and make the Earth grow warmer. That is why they are nicknamed "greenhouse gases".

It is our responsibility to take care of our planet. Global warming is a **serious** problem with serious consequences. If we want future generations to enjoy their time on Earth, we must act now.

Question 31. What is the main purpose of the passage?

A. To explain the advantages of global warming
B. To discuss the causes and effects of global warming
C. To describe how greenhouse gases benefit the environment
D. To highlight how pollution improves weather patterns

Question 32. What could be one of the consequences of global warming?

A. The Earth's temperature will become colder
B. Plants and animals might become extinct
C. Polar ice will grow, causing lower sea levels
D. Human diseases will completely disappear

Question 33. How do "greenhouse gases" contribute to global warming?

A. They block the sun's rays from entering the atmosphere.
B. They prevent pollution from reaching the atmosphere
C. They trap heat in the Earth's atmosphere like a greenhouse
D. They cool the Earth's surface temperature gradually

Question 34. According to the passage, what are humans mainly responsible for?

A. Preventing global warming
B. Reducing the spread of human diseases
C. Increasing plant and animal populations
D. Adding pollution to the atmosphere

Question 35. What does the word **"gradual"** in the sentence "This gradual trend is called global warming" mean?

A. Sudden
B. Slow
C. Unpredictable
D. Unchanging

Question 36. Which word in the passage is the **OPPOSITE** of **"serious"** in the context of energy savings?

A. Trivial
B. Severe
C. Critical
D. Important

Four phrases/sentences have been removed from the text below. For each question, mark the letter A, B, C or D on your answer sheet to indicate the correct option that fits each of the numbered blanks from 37 to 40 the most.

A. can be turned into cleaning rags
B. Reusing items also helps reduce waste
C. are simple ways to protect the environment
D. Following the 3Rs can make the Earth cleaner

The 3Rs—Reduce, Reuse, and Recycle (37)____. By reducing waste, we can save natural resources and minimize pollution. For example, people can use cloth bags instead of plastic ones or buy products with less packaging.
(38)_____. Instead of throwing things away, try to find new purposes for them. Old jars can be used to store food, and worn-out clothes (39)_____.
Recycling is equally important. Separating paper, glass, and plastic from regular trash ensures these materials are processed and made into new products. (40)_____and greener for future generations.
