TEST 10 G10

PART 3 READING COMPREHENSION (30 POINTS)

A. Read the following passage. Complete the sentences with NO MORE THAN TWO WORDS from the passage.

AI IN EDUCATION

Artificial Intelligence (AI) has revolutionized the ways things are done in many aspects of life. In education, AI has offered experiences and solutions that were once thought impossible. The market for AI use in education has grown nearly by half in the past five years. This does not mean that teachers are going to be replaced soon, but it suggests that AI can be used in the classroom to provide students with more satisfying learning experiences. First, AI personalizes students' learning journey by adapting to each student's learning style and level of learning. Based on students' performance, it can also provide personalized feedback and guidance if necessary. This personalization feature, which can hardly be possible in the traditional classroom, is very important for student development. Second, AI brings more innovative and engaging learning experiences to students. With AI applications, students can perform experiments without lab equipment or travel to faraway places while still physically staying inside their classrooms. Third, with personalized learning comes personalized assessment. With AI, students can be graded on their own scales, which helps testing become a less stressful experience for students. Given its numerous benefits, AI is certainly one of the key factors that shape the future of the education industry.

NOTES

- The market for AI use in education has grown (36) _____ within a few years.

  First benefit of AI: personalized learning

- Adapting to each student's level and (37) _____

- Providing guidance and (38) _____ to each student, which is nearly impossible in (39) _____ classroom.

  Second benefit of AI: new and (40) _____ learning experiences, e.g.

- Students can perform (41) _____ without lab equipment or virtually visit (42) _____ places.

  Third benefit of AI: personalized (43) _____

- Assessing students based on their own (44) _____, making testing less (45) _____.
