1. All matter has two general properties: mass and _____

2. We measure mass in kilograms and _____

3. Mass divided per volume is_____

A) Air
B) Metres
C) Density
D) Kilograms
E)

4. _____ is a mixture of different gases.

5. What factors affect friction? _____

A. force and motion
B. weight and type of surface
C. density and volume

6. _____ are machines that use different energy sources to provide enough force to make vehicles move.

A. Engines
B. Rollers
C. Wheels
D. Friction
