It can't be denied that teenagers are completely hooked on technology. In my opinion, technology has some positive effects for them.

Firstly, using gadgets or other devices makes life more enjoyable. Media devices such as mobile phones and laptops allow access to information and entertainment and make communication easier and faster. Of course, they need internet.

Secondly, technology is a valuable resource that has allowed teens to learn new skills. For example, they can cook by watching videos on YouTube or TikTok. They can also do their homework with the help of internet.

To sum up, teenagers' use of gadgets and other devices can enrich their daily experiences in many ways. Due to technology advances, I think teenagers will be well-prepared for the future.

8. What is the topic of the text above?

Many people use plastic bags when they want to buy something in traditional markets or grocery store. People who care deeply about environment will tell you that plastic bags have negative impacts to our planet.

Plastic bags are not biodegradable. It can take thousands of years to biodegrade. This means plastic bags that gets thrown away will stick around for many generations. Over the next ten years, the amount of marine plastic waste will double and if we do not act, in 2050 the oceans will contain more plastic waste than fish by weight.

It is probably impossible to totally eliminate plastic from our lives, but we should reduce the amount of plastic we use. For example, at the grocery store, we can bring our own reusable shopping bag.

13. What is the topic of the text above?
    a. The use of plastic bags.
    b. How to transport things.
    c. The negative effects of plastic bags.
