Multiple-Choice Questions

1. Which is the outermost layer of the Earth?
A. Mantle **C. Crust**
B. Outer Core **D. Inner Core**

2. The Earth's structure is composed of how many major layers?
A. Two **C. Four**
B. Three **D. Five**

3. Which layer of the Earth is the thickest?
A. Crust **C. Outer Core**
B. Mantle **D. Inner Core**

4. What is the main composition of the outer core?
A. Rocks and minerals **C. Iron and nickel in liquid form**
B. Iron and nickel in solid form **D. Silicates and oxygen**

5. The inner core is found at which part of the Earth?
A. Beneath the crust **C. At the center**
B. Above the mantle **D. Below the ocean floor**

6. The mantle is divided into which two parts?
A. Upper and lower mantle **C. Continental and oceanic mantle**
B. Inner and outer mantle **D. Hot and cold mantle**

7. Which layer of the Earth is solid but under immense pressure?
A. Outer Core **C. Inner Core**
B. Mantle **D. Crust**

8. The crust is further classified into:
A. Upper and lower crust **C. Oceanic and continental crust**
B. Inner and outer crust **D. Thick and thin crust**

9. Which statement about the outer core is TRUE?
A. It is solid and cool. **C. It is gaseous and light.**
B. It is liquid and composed of molten metals. **D. It is the thinnest layer.**

10. Why is the Earth capable of sustaining life?
A. Because of its atmosphere and balanced structure
B. Because it has a solid crust only
C. Because it is the hottest planet
D. Because it is closer to the Sun
