Reading

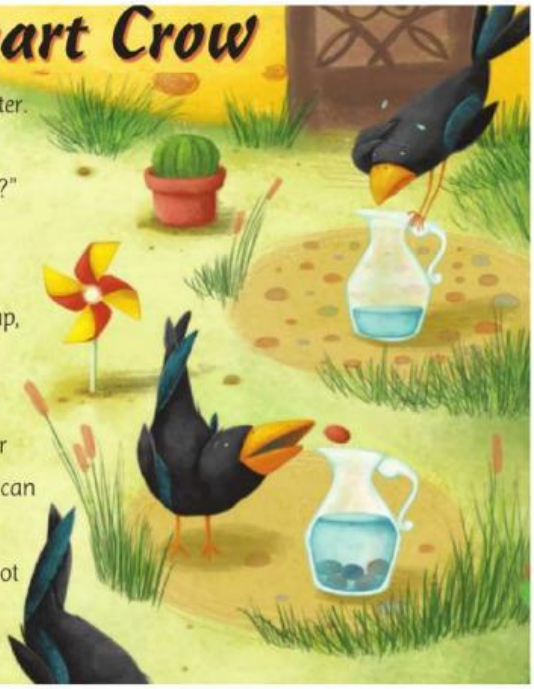
Smart Crow

Crow is thirsty. She finds a pitcher. It has a little water. Crow tries to drink. Her beak can't reach the water! "The pitcher is too tall!" says Crow. "What can I do?" Crow thinks about it.

Then Crow picks up a stone. She drops it in the pitcher. Plop! It goes in the water. The water goes up, just a little bit.

Crow tries again. She still can't touch the water. But she drops more stones in the pitcher. The water goes up. Plop, plop, plop! Up, up, up! Finally, Crow can reach the water.

"Now, I can drink the water!" says Crow. She's not thirsty anymore. What a smart Crow!



1. What is crow's problem?

2. What sentences in the text show how crow solve his problem.

3. Crow found a pitcher with little water. What other substances can we put in a pitcher?

4. The crow in the story can think, talk and solve problems. Write what real crows can or can't do.

Crows can	Crows can't
