When adding and subtracting 4 digit numbers we usually round to the nearest 100.

5673 + 3245 =	5373 - 1435 =	5145 + 2286 =
5700 + ____	5400 - ____	____ + ____

When multiplying a 3 digit number by a 1 digit number we only round the 3 digit number to the nearest H

467 x 3 =	624 x 2 =
___ x 3	___ x 2

When dividing a 4 digit number by a single digit number we round to the nearest H that is the closest multiple of the number we are dividing by.

2159 / 5 =	1441 / 3 =
2000 / 5	____ / 3

4435 + 2878 =	6578 - 2854 =	4435 + 4351 =
____ + ____	____ - ____	____ + ____

378 x 4 =	1564 / 6 =	2 x 6 = 12
___ x __	____ / _	3 x 6 = 18
