***Read the following passage and mark the letter A, B, C, or D on your answer sheet to indicate the correct answer to each of the following questions.***

The Great Barrier Reef is one of the most famous natural wonders in the world. Located off the coast of Queensland, Australia, it covers a distance of more than 2,300 kilometers and is home to thousands of marine species. Because of its rich biodiversity and stunning beauty, the reef attracts millions of visitors every year.

The reef plays an important role in the marine ecosystem. It provides shelter and food for many types of fish, sea turtles, and coral species. Scientists and environmentalists often emphasize that protecting the reef is essential for maintaining ocean health. Activities such as responsible tourism and reducing water pollution can help preserve this fragile environment. In addition, educational programs have been developed to raise public awareness about reef conservation.

However, the Great Barrier Reef faces several serious threats. Rising ocean temperatures, caused by climate change, have largely led to coral bleaching in many areas. Pollution and overfishing also put pressure on the reef's natural balance. Therefore, experts believe that global cooperation and local conservation efforts are necessary to ensure that future generations can continue to enjoy this natural treasure.

Question 23. What is the main idea of the passage?
A. The Great Barrier Reef is mainly a tourist destination with its beautiful coral reefs.
