Part 2

Questions 9 to 16

Read the text below and correct the underlined errors.
For each question, write the correct word in the space provided on your answer sheet.

Recently, NASA **(0)** succeeded **(9)** launching the Space Launch System rocket **(10)** who is the most powerful rocket in the making. This allows the Orion to **(11)** breaking free of Earth's gravity to explore the Solar System. The Orion is NASA's new powerful spacecraft designed to carry humans to **(12)** far destinations such as the Moon and Mars.

This historical launch is one of the first major steps **(13)** on the Artemis mission towards putting humans back on the Moon in almost 50 years since Neil Armstrong. This first flight has been about testing the engines **(14)** or systems in the absence of astronauts as part of the Artemis 1 programme. In Artemis 2, the astronauts will get **(15)** them chance to fly the Orion but Artemis 3 is the most highly **(16)** anticipating because it will be an attempt to land people on the Moon again which could be happening in 2025 or 2026.

Example:

0	successfully

Answers:

9		**10**		**11**		**12**	
13		**14**		**15**		**16**
