NAME: _____

GRADE / SECTION:_____

HTML Elements

An **HTML element** is usually composed of a "*Start Tag*", "*Element Content*" and and "*End Tag*"

EXAMPLE:

 This is an element content

Start tag Element Content End Tag

Nested HTML Elements

Nested HTML elements are HTML tags placed **inside** other HTML tags.
When one element is contained within another, the inner element is said to be *nested* inside the outer (parent) element

Thers are some cases where an HTML element can contain one or more HTML elements. For you to understand it, look at the example code below. Wherein and are the start tags, while "Italized text" is the Element content, then and are the end tags,

  Italized text

Empty Elements

Empty Elements are elements that do not have an element content and an end tag.

Tag	Function
 	Line break or simply line space
<img>	Inserting image
<hr>	Horizontal rule

QUIZ # 2
