Read the text. Choose *True* or *False*.

Veronica's not a nurse or a doctor, but she knows the local hospital very well. You can usually find her there every time one of her three sons has an accident. And believe me, they have had many accidents.

Her oldest son is Tyler. He's ten years old. Once, while Tyler was riding his bicycle, he fell off and broke his arm. Veronica drove him to the hospital.

Her second son is Collin. He's eight. He was playing soccer when he ran into another player and sprained his ankle. Veronica drove him to the hospital.

Her third son is Charlie. He's six. Charlie fell down the stairs and cut his head. Again, Veronica drove to the hospital.

She asks her sons to be more careful and pay attention, but they are very energetic. She worries that they will hurt themselves. They run around the house, and she's afraid that one of them will crash into something and get a black eye. She's also afraid that one of them will trip over something and hurt his legs, arms, or head. The only time Veronica rests is when the boys are sleeping.
