

# space travel - real conditional

FULL NAME: \_\_\_\_\_

Read a dialogue between the astronaut and a journalist to answer the activity with the structure of real conditional.

Harry Lee is a space tourist. He is going on a three-month space mission.

Interviewer: Three months is a long time. What will you do if you miss your family?

Harry: If I miss them, I will call or email. There are lots of ways to communicate in space.

Interviewer: What about food? If you don't like the food, will it be a problem?

Harry: Yes, it will. If I don't eat, I will be hungry! But space food is good.

Interviewer: What will happen if you are sick?

Harry: That's a good question! If I'm sick, I will call a doctor on Earth and I will ask for advice.

Interviewer: And what about at night? You won't enjoy the trip if you can't sleep.

Harry: I will count the stars if I can't sleep. There are millions of them.

## DRAG AND DROP

- a) If the astronauts miss their family \_\_\_\_\_ **They will call or email**
- b) If the astronauts think there is a problem with the spacecraft,  
\_\_\_\_\_
- c) Harry will wear a spacesuit \_\_\_\_\_
- d) If \_\_\_\_\_ the astronauts don't wear spacesuits,  
\_\_\_\_\_
