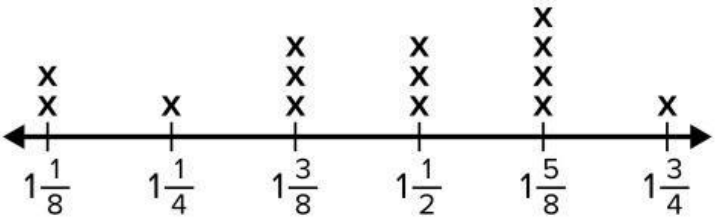
Lesson **12-5**

Exit Ticket

Name _____

1. Cassie measures the lengths of some beetles for a project.

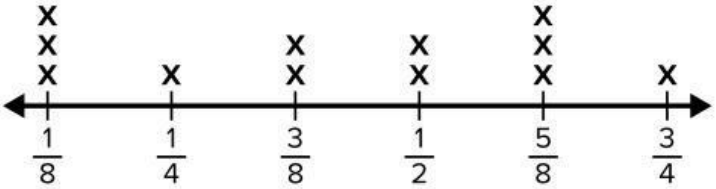


Lengths of Beetles (inches)

a. What is the difference in length between the longest and shortest beetles?

b. What is the total length of the beetles that are $1\frac{3}{8}$ inches long?

2. The line plot shows the amounts of blueberries that 12 friends picked.



Amounts of Blueberries (gallons)

The friends decide to divide the blueberries so each friend has the same amount of blueberries. How many gallons of blueberries does each friend get?

Reflect On Your Learning

I'm confused. — I'm still learning. — I understand. — I can teach someone else.
