I. True or False

1. Every animal cell has a cell wall. _____
2. The cell wall is strong and stiff. _____
3. Plant cell membranes are made of cellulose. ____
4. All cells have a nucleus.
5. All cells have cytoplasm.
6. Cell membrane is thick and flexible.
7. Cell wall is the inner edge of the cell.
8. Cell membrane is the inner edge of the cell.
9. The cell wall controls what goes in and out of the cell.
10. Nucleus holds the plant cell in shape.
11. Chemical reactions happen inside the cytoplasm.
12. Chloroplast is the place where plants make food.
13. Mitochondrion is a large fluid-filled space.
14. All plant cells have mitochondria.
15. The solution found in sap vacuole is called cell sap.
16. All plant cells contain chloroplasts.
17. Chloroplasts contain a green substance called chlorophyll.
18. Energy is released from food in mitochondria.
