Label the images to show the type of behavioral adaptation using the terms below.

communicating - hibernation - playing dead - defense - using tools - migration - living in groups

A **behavioral adaptation** is something an animal does

A **structural adaptation** is something an has as part of it's body

Label the adaptation

When threatened I make myself bigger.

I travel to find a mate.

I sleep in a burrow or cave in winter.

I huddle together with others to keep warm.

I use a stone to crack open a nut.

I growl to protect myself.

I dig a burrow into the mud and sleep until the rains come.

I travel to a warmer place in winter.

I play dead when threatened.

I squawk to warn others of danger.
