There is one incorrectly spelt word in each line. Select the incorrectly spelt word. Write the correctly spelt word in the box provided.

Meerkat, a burowing member of the Mongoose family,

is found in South Africa. It is unmistakeably

recognisable in its upright posteure as it watches

for predators. The Meerkat is slendar and has a pointed

little face, tiny ears, and black eye patches. Body lenght is

about 29 cm in highth and the pointed tail is 19 cm.

Water is the transparant, tasteless, odorless and nearly

colorless chemical substance that is the main constituent

of Earth's streems, lakes, and oceans, and the fluids of

most living organsims, and that is vital for all known

forms of life. Even though it provides no caloris,

there are organic nutrients and trace minerales.
