There is one grammar error in every line in the passages below. Select the error and write the correct form of the word in the box provided.

The greenhouse effect is a natural process that warm the
surface of the Earth. Many of the sun's energy is sent
back into the atmosphere and the rest is trapped with
the greenhouse gases. The energy is absorb and warms
the Earth's surface. The impacts are already saw all over
the globe. A very sensibly approach is needed to help.

Neither she nor I are going to the cinema today. We
have to prepared for a test on Monday. The teacher
reminded we of the topics to study - Mathematics,
Vocabulary and Spelling. The marks for this tests
will be added too our end of term marks and the
child with the high score will get an award.
