Scorpions

- Scorpions are amazing animals. They live all over the world, but they live in Antarctica. You can find them in jungles, forests and caves, but lots of scorpions live in the desert, under the ground. They go out in the day to look for food.
- Scorpions are usually about 60 cm long.
- Scorpions often eat insects, like spiders, but they don't eat a lot of food.
- Some scorpions only eat one insect in a day.
- Scorpions are never dangerous to people.
- Mother scorpions usually have four to eight babies. Their nests are usually under the ground. The babies live on their father's back.
