

Student's name: _____

Book: Metro 3 Units: 2-3

1. Tim is reading an article about life in the future. Read the text and do the activities.

OUR FUTURE

In the next few decades, new inventions and discoveries will make huge changes to our lives. On this article, scientists give their predictions about life in the future.

Will there be schools in the future?

Yes, children will still go to school, but schools will be very different. There will still be teachers, but computers will teach some lessons. Some students will stay at home and learn in virtual classrooms. Virtual reality will give them an image of a classroom in three dimensions- or 3D. They will see their teacher and their friends, so they will feel like they are really at school.

Will computers understand what we say to them?

Computers will be more intelligent. They will understand what we say, what we think and how we feel. In the future, humans and computers will be part of a huge radio network. We will send messages from our brain to our computer and the computer will send messages straight to our brain, without using wires. When you want to learn something new, your computer will send the information straight to your brain.

Will we have robots to help us?

In the future, we will have lots of very clever robots called nanobots. Nanobots will be very small, but they will be everywhere. They will clean our homes, mend our clothes and make our meals.

Will there be televisions?

Televisions in the future will be very different from televisions now. They will be much bigger and the pictures on the television won't be flat. They will all be in 3D. You will be able to walk into your favourite TV programme. It will happen all around you.

A- Read the text again and choose True or False. (2x6=12)

1. There won't be any schools in the future. ____
2. In some lessons, computers will teach the students. ____
3. Some students will have lessons at home. ____
4. Computers will identify our feelings. ____
5. We will have computers in our brains. ____
6. Our brains will be connected to computers with wires. ____

B- Do you agree with the article "Our future"? Can you describe life in Salta in fifty years?
(3p)

2- Tim is at school. He and his classmates are working on a project about bullying. Read the beginning of the sentences and match them with the correct ending. (2x6=12)
