

ELECTROSTATIC CHARGES AND OHM'S LAW

(1) Choose the right answer

- (a) Transfer of static charges between objects are known as _____
- (b) Electric charges consist of _____ type of charges
- (c) Only _____ are transferred from one object to another
- (d) Objects that _____ electrons negatively charged.
- (e) Objects that _____ electron positively charged.

(2) Match the right answer

VOLTAGE

Electric current directly proportional to voltage

RESISTOR

Unit for resistance

OHM'S LAW

Standard International unit for current

Ω

Potential difference between two points

Ampere

To limit or resist flow of electric current
