ELECTROSTATIC CHARGES AND OHM'S LAW

(1)	Choose the right answer			
(a)	Transfer of static charges between objects are known as			
(b)	Electric charges consist of			type of charges
(c)	Only		are tr	ransferred from one object to another
(d)	Objects that electrons negatively charged.			
(e)	Objects that electron positively charged			electron positively charged.
(2)	Match the r	right answer		Flactnic cumont dinactly proportional to
VOLTAGE			•	Electric current directly proportional to voltage
				, on ago
				Unit for resistance
RESISTOR		•	•	Onit for resistance
OHM'S LAW		•	•	Standard International unit for current
Ω		•	•	Potential difference between two points
Ampere		•	•	To limit or resist flow of electric current
