

## 6.1 Sumber Tenaga

1. Tenaga elektrik boleh dijana daripada pelbagai sumber. Kenal pasti sumber-sumber tenaga di bawah. **TP 1**

| Biojisim<br><i>Biomass</i><br>Matahari<br><i>Sun</i>                                     | Air<br><i>Water</i><br>Bahan radioaktif<br><i>Radioactive substances</i>                 | Ombak<br><i>Wave</i><br>Geoterma<br><i>Geothermal</i>                                    | Arang batu<br><i>Coal</i><br>Petroleum<br><i>Petroleum</i>                                | Pasang surut<br><i>Tides</i><br>Angin<br><i>Wind</i>                                       |
|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------|

| (f)<br> | (g)<br> | (h)<br> | (i)<br> | (j)<br> |

2. Sumber tenaga boleh dibahagikan kepada dua jenis. **TP 2**

Lengkapkan peta pokok di bawah tentang jenis sumber tenaga.
