

ADHD

STAYING IMPEDIMENT TREATED DIFFICULTY ATTENTION

Deficit/Hyperactivity Disorder has affected more than 6.4 million children at some point. While there is some debate as to whether or not ADHD is a learning disability in the most technical sense, there is no doubt that it is a common learning . Students who have ADHD have difficulty paying attention and on task. These students can be easily distracted and often have in traditional school settings. Experts link ADHD with the structure of the brain, and there is evidence that ADHD may have a genetic component as well. Unlike typical learning disabilities, which need instructional interventions, ADHD can be successfully with medications and behavioral therapies.

Glossary:

Attention – uwaga

Affect – dotyczyć, wpływać na ...
