

### 連接詞③—表「讓步」(although; though)

▲ Although/ Though 的意思為 \_\_\_\_\_，用以表示意料之外或相反的結果。

※注意：在英文裡，although/ though 不可與 but( )同時使用！

↓請使用 although/ though/ but 合併下列句子：

|   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 例 | <div style="display: flex; justify-content: space-between;"> <div> <p>{ Alan studied hard.<br/>Alan failed the test.</p> <p>Although <u>Alan</u> studied hard, <u>he</u> failed the test.</p> <p>= <u>Alan</u> failed the test <b>although</b> <u>he</u> studied hard.</p> <p>= <u>Alan</u> studied hard, <b>but</b> <u>he</u> failed the test. (第二次提到請使用 <span style="border: 1px solid black; padding: 0 10px;"> </span>)</p> </div> <div style="text-align: right;"> <p>(中譯) 雖然 Alan 很用功讀書，<br/>但是他考試卻不及格。</p> </div> </div> <div style="text-align: right;">  </div> |
| 1 | <div style="display: flex; justify-content: space-between;"> <div> <p>{ They are poor.<br/>They are happy.</p> <p><b>Though</b> they _____, they _____.</p> <p>= They _____ <b>though</b> they _____.</p> <p>= They _____, <b>but</b> they _____.</p> </div> <div style="text-align: right;"> <p>(中譯)</p> </div> </div>                                                                                                                                                                                                                                                                                                                                     |
| 2 | <div style="display: flex; justify-content: space-between;"> <div> <p>{ Life is hard for Anna.<br/>Anna never loses hope.</p> <p><b>Although</b> _____, _____.</p> <p>= _____ <b>although</b> _____.</p> <p>= _____, <b>but</b> _____.</p> </div> <div style="text-align: right;"> <p>(中譯)</p> </div> </div>                                                                                                                                                                                                                                                                                                                                                |
| 3 | <div style="display: flex; justify-content: space-between;"> <div> <p>{ Math is boring.<br/>I spend much time studying math.</p> <p><b>Though</b> _____, _____.</p> <p>= _____ <b>though</b> _____.</p> <p>= _____, <b>but</b> _____.</p> </div> <div style="text-align: right;"> <p>(中譯)</p> </div> </div>                                                                                                                                                                                                                                                                                                                                                 |

### 連接詞④—表「條件」(if)

▲ If 的意思為 \_\_\_\_\_，根據語意勾選「條件」or「結果」。

|   |                                                                                                                                                                                             |
|---|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1 | <b>If</b> I don't understand something, I'll ask the teacher right away.<br><input type="checkbox"/> 條件 <input type="checkbox"/> 結果 <input type="checkbox"/> 條件 <input type="checkbox"/> 結果 |
| 2 | <b>If</b> Mark comes to school tomorrow, give him the book.<br><input type="checkbox"/> 條件 <input type="checkbox"/> 結果 <input type="checkbox"/> 條件 <input type="checkbox"/> 結果              |
| 3 | We won't have to practice <b>if</b> it rains this afternoon.<br><input type="checkbox"/> 條件 <input type="checkbox"/> 結果 <input type="checkbox"/> 條件 <input type="checkbox"/> 結果             |
| 4 | You should help your son <b>if</b> he asks you for help.<br><input type="checkbox"/> 條件 <input type="checkbox"/> 結果 <input type="checkbox"/> 條件 <input type="checkbox"/> 結果                 |

▲ Please look at the above sentences, and put 條件 and 結果 in the right place:

|                                                     |                                                                                              |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------|
| <b>If</b> _____, _____.<br>= _____ <b>if</b> _____. | ※條件是_____談好的條件。<br>※結果可以是：<br>①_____發生的結果<br>②祈使句(VR 開頭)<br>③含助動詞(could, should, must...)的子句 |
|-----------------------------------------------------|----------------------------------------------------------------------------------------------|

▲ Let's do more exercise! (記得要輸入標點符號)
