

- 1 Look at the graph about accidents at middle schools.

Answer the questions in your notebook

- How many accidents happen per week?
- Where do a lot of accidents happen?
- Do you have to be more careful inside or outside the classroom?

2 In your notebook, make 3 sentences using the vocabulary in the chart.

We can	hit hurt cut break	our	heads	if	we run too fast in the school hall.
			arms		we don't use the necessary protection.
			hands		we don't follow our teacher's suggestions.
			fingers		we don't pay attention when we walk.
			legs		we jump on the school stairs.
			faces		we don't look in front of us.
			stomachs backs		we push our classmates in a game.

We can hit our heads if we don't look in front of us.

3 Read the next interview with Ms. Román.

Man: Hello, everybody! Welcome to our 'Safe Schools' programme. Today we're here with Ms Román, a Physical Education teacher who works at Puerto de Buenaventura School in Cali. How are you today, Ms Román?

Ms Román: Hello. I'm fine, thank you. I'm very happy to be here

Man: Tell us, Ms Román, what are the typical accidents students have in your school?

Ms Román: Well ... students usually have simple accidents because they don't pay attention or don't follow the rules when they play sports. For example, one of the most common accidents I have in my classes is when students hurt themselves, especially their elbows and their knees.

Man: Why does this happen?

Date:
Topic:

Safe Schools

Ms Román: They hurt themselves because they run too fast and they don't look in front of them. Sometimes also because students push other students by accident.

Man: Aha! Any other accidents?

Ms Román: Well ... there's another common accident. Students hit their heads or legs on the chairs or the tables in the classrooms, and also the chairs in the playground. Again, this usually happens because students don't pay attention when they walk or run.

Man: OK. Well, dear listeners, this is another story from a Colombian school. We'll be back later with another interview. Ms Román, thank you very much for your time.

Ms Román: Thank you. And remember, it's very easy to prevent accidents at school. Pay attention!

3 Write in your notebook (T true or F false)

	T	F
1. Ms Román is a Mathematics teacher.	<input type="checkbox"/>	<input checked="" type="checkbox"/>
2. Students usually have accidents because they don't pay attention.	<input type="checkbox"/>	<input type="checkbox"/>
3. Students often cut their fingers.	<input type="checkbox"/>	<input type="checkbox"/>
4. Sometimes a student can push another student by accident.	<input type="checkbox"/>	<input type="checkbox"/>
5. The stairs and the hallways are typical places where accidents happen.	<input type="checkbox"/>	<input type="checkbox"/>
6. For Ms Román, attention is the best way to prevent accidents at schools.	<input type="checkbox"/>	<input type="checkbox"/>

4 Write in your notebook, how we can prevent accidents at school.

To prevent accidents in the classroom it's important to pay attention.
And to prevent accidents in the stairs it's important not to jump ...

Useful Expressions

To prevent
It's important to
It's important not to

5 Look a report from the interview

Good afternoon, Camila.
How are you?

What accidents can happen in your school?

Fine, thanks.

In my class, students sometimes ...

1 This is Andrea. She's 12 years old. She's in 6 C.

2 Accidents can sometimes happen ... For example, she ...

3 There are accidents in ... and in ...

4 To prevent accidents we can ... and we can ...

5 In conclusion, ...

Final task activity!

6 Listen the poem. Then, repeat

I have one head. My parents have two heads.
I have one nose. My parents have two noses.
I have two ears. My parents have four ears.
I have ten fingers. My parents have twenty fingers.
I have thirty-two teeth. My parents have ... I don't know!
