

Contoh PdPc

Titik tengah ialah titik yang membahagi suatu tembereng garis kepada dua bahagian yang sama panjang.

Midpoint is a point that divides a line segment into two parts of the same length.

C ialah titik tengah bagi garis AB.
C is the midpoint of line AB.

6. Tentukan titik tengah bagi garis-garis berikut. (TP1)
Determine the midpoint of the following lines.

(a)

- (i) Titik tengah bagi garis PU =
Midpoint of line PU
- (ii) Titik tengah bagi garis QS =
Midpoint of line QS
- (iii) Q ialah titik tengah bagi garis =
Q is the midpoint of line

(b)

Titik tengah bagi garis:
Midpoint of line:

- (i) EH =
(ii) BF =
(iii) CG =
(iv) AG =

- Nyatakan koordinat titik tengah bagi garis lurus GH. (TP2)
State the coordinates of midpoint of line GH.

Contoh PdPc

Titik tengah = (3, 3)
Midpoint

(a)

Titik tengah = $(3, \frac{5}{2})$
Midpoint

(b)

Titik point = (-1,)
Midpoint

Lengkapi berikut untuk menerbitkan rumus titik tengah antara titik P dan titik Q . **TP2**
 Complete the following to derive the formula of midpoint between point P and point Q .
