

This week's video is about the means of transport in London. As you saw, there are plenty of options for someone to move around the city. We also live in a big city, Athens. There are many ways to move around the city but which means of transport do you think is the best to use in Athens? Which is the quickest and most efficient way to explore Athens? Make a short presentation about the best means of transport for someone to use in Athens and why it's worth using this particular one.

Tip: You can also take a look at the following table to help you with your activity!
