Name:

Read and choose the correct answer.

Malaysia's most famous airport, the Kuala Lumpur International Airport (KLIA) in Sepang was opened in 1998. At this airport, aeroplanes take off and land on the runways every few minutes. Most aeroplanes carry about 200 to 400 passengers so thousands of travellers pass through the airport every day.

Many passengers look happy because they are flying off for their holidays. Others who have just arrived look tired after their long flight. There are also many groups of people waiting to welcome their relatives and friends home. Hence, KLIA is always crowded.

Hundreds of workers have to be on duty round the clock. Dozens of ground attendants have to attend to passengers who want to check in. Teams of drivers and porters are needed to transport bags to and from the aeroplanes. Several security guards also will check every passenger who enters the boarding area to make sure that no one carries dangerous objects into the aeroplane.

Word Power

famous: 著名的
flight: 航程
crowded: 拥挤的
on duty: 值班；值勤
porters: 行李员
