

B) Hitung **jejari** bagi bulatan dengan lilitan berikut :

1) Lilitan = 13.2 cm [$\pi = 3.142$]

$$13.2 = 2\pi r$$

$$13.2 = \quad \times \quad \times r$$

$$13.2 = \quad \times r$$

$$\frac{13.2}{\quad} = r$$

$$r =$$

2) Lilitan = 171.2 cm [$\pi = 3.142$]

$$171.2 = 2\pi r$$

$$= \quad \times \quad \times r$$

$$= \quad \times r$$

$$\frac{\quad}{\quad} = r$$

$$r =$$

c) Hitung **diameter** bagi bulatan dengan lilitan berikut :

1) Lilitan = 78.55 cm [$\pi = 3.142$]

$$78.55 = \pi d$$

$$78.55 = \quad \times d$$

$$\underline{78.55} = d$$

$$= d$$

2) Lilitan = 46.5 cm [$\pi = 3.142$]

$$= \pi d$$

$$= \quad \times d$$

$$\underline{\quad\quad\quad} = d$$

$$= d$$
