

A TYPICAL WEB PAGE

Look at the screenshot of a typical web page. Match the words to the features (a-k).

refresh - image link - zoom - go forward - user icon - go back - URL - favorites - home - hypertext link - search box

The screenshot shows a web browser displaying the Cambridge Assessment English website. The browser's address bar shows the URL: <https://www.cambridgeenglish.org/learning-english/free-resources/>. The website has a dark header with navigation links: View related sites, Recognition, Agents, Consultancy, Research, and a 'Change Language' button. Below the header is the Cambridge Assessment English logo and a search bar. The main content area is titled 'Free resources' and includes a sidebar with links to Learning English, Activities for Learners, Exam preparation, Free resources (highlighted), Virtually Anywhere, Cambridge English Write & Improve, Parents and children, and Games and social media. The main content area also features four large images with text overlays: 'Virtually Anywhere', 'Cambridge English Write & Improve', 'Games and social', and 'Help your child learn English'. Labels a-k are placed around the page to identify specific features: a points to the back button, b to the forward button, c to the address bar, d to the home button, e to the refresh button, f to the user icon, g to the search bar, h to the zoom button, i to the search button, j to the 'Free resources' title, k to the 'Change Language' button, and l to the 'Virtually Anywhere' image.
