You will hear the interview **twice**. Answer all the questions

Vaccines

Vaccines prevent us from contracting diseases. The traditional kind takes advantage of the _____ (21) of pathogens, which are the organisms that cause these diseases. More advanced vaccines are based on the incorporation of new _____ (22) material. Both types stimulate the immune _____ (23) to combat a disease within the body.

The first vaccine was the cowpox virus administered by Edward Jenner in 1796. A _____ (24) later, the cholera vaccine was developed by Louis Pasteur. In Malaysia, every child receives a _____ (25) that helps parents plan their clinic visits for timely vaccination doses. Additionally, vaccinations are carried out in _____ (26) to ensure every child is immune to critical diseases. Only people with health complications and those _____ (27) to pathogen components are exempted from vaccination. Herd immunity protects these vulnerable members of the community but the _____ (28) of vaccinated individuals must be high enough.

Vaccine development is a long and _____ (29) process. A few rounds of testing is necessary to prove the vaccine is _____ (30) for use. Storage and transport of vaccines continue to be challenges to overcome.
