

Contour Diagrams - 1

Practice Worksheet

NAME:		ROLL NO:
SUBJECT:	DATE:	GRADE/DIV:8 Ekam/Ena/Eins
OBJECTIVE: The learners will be able to – Read and identify simple landforms using the given contour maps		

INSTRUCTIONS:

Q.1. Fill in the blanks choosing the appropriate answer from the given table:

fixed	gentle	height	steep	Concentric circles	uniform	spacing	intersect
-------	--------	--------	-------	--------------------	---------	---------	-----------

1. A contour line is an imaginary line that connects all points having the same _____.
2. The contour lines of a conical hill are evenly spaced in the form of _____.
3. Contour lines are drawn at _____ intervals.
4. Contour lines do not _____ one another.
5. The _____ between contour lines determines the nature of the slope.
6. If contour lines are drawn close together, it indicates that the slope of the land is _____.
7. If the contour lines are far apart, it indicates that the land is _____.
8. Contour lines drawn at equal intervals indicate that the slope is neither steep nor gentle. Such a slope is called a _____ slope.

2. Join the contour map (column 1) with the appropriate landform (column 2).

Note : For deleting the pencil line, drag another line to the correct option. The incorrect line would disappear by default.

- Q.3. Read the given contour diagram and answer the question given below. Choose the answer from the box given below:

50

40

30

20

10

- a) What is the contour interval in the given diagram?

- b) What is the height of the given relief with respect to the above diagram?
