

PART 3

For questions 17–24, read the text. Use the word given at the end of some of the lines to form a word that fits in the gap in the same line.

How many senses do you have?

The usual answer is five:

⁶ sight , hearing, touch, taste and smell. But a more

¹⁷ look at how the body works suggests there are a lot more.

So why the ¹⁸ in number? It's all to do with sensors.

These are what make the world

¹⁹ to us. Sensors in the eye don't just make us see what's

²⁰ They detect light and dark, and colour. There are skin sensors that help to keep us

²¹ by detecting hot, cold, itch and pressure, as well as touch. One of the most important types of skin sensors tells us when something

is ²² How else would we keep ourselves safe?

If damage is caused to the sensors in the ear, it might not result in

²³ , but your balance may be affected. Other senses include hunger, thirst, knowing where your body parts are in relation to each other, and a sense of time.

So if anyone asks you, 'How many senses are there?' remember not to sound ²⁴ by answering 'five'.
